

# Microsoft Dynamics 365 for Finance and Operations

Accelerate your business growth. Microsoft Dynamics 365 for Finance and Operations helps enterprises to make smarter decisions quickly, transform business processes faster, and enable rapid business growth at global scale.

“As the company geared up for new opportunities, we needed a new, unified core system that would better serve our organization’s business complexity and give us the speed to enable continued growth. We chose Microsoft Dynamics 365 for Finance and Operations.”

**Eric Reading**

Executive Vice President, Chemonics

## Key benefits

### MAKE SMARTER DECISIONS

Unify your financial and business operations to gain real-time insights and intelligence across your organization and supply chain, enabling you to make smarter decisions, faster.

### TRANSFORM BUSINESS FASTER

Transform your business and stay competitive by easily redesigning processes without disrupting your ongoing operations.

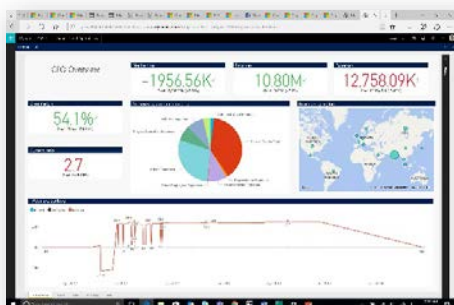

### DRIVE RAPID GROWTH

Leverage a powerful, flexible, and intelligent cloud ERP to rapidly grow your business globally with the peace of mind that your information will be secure.

## Key capabilities

### FINANCE

Microsoft Dynamics 365 for Finance and Operations unifies financial and business operations data combined with built-in predictive analytics and intelligence to help you get deeper business insights to improve financial controls, accelerate cashflow, reduce days’ sales outstanding, and achieve corporate compliance. Better anticipate business needs, increase forecasting accuracy, and drive corporate strategy and growth.

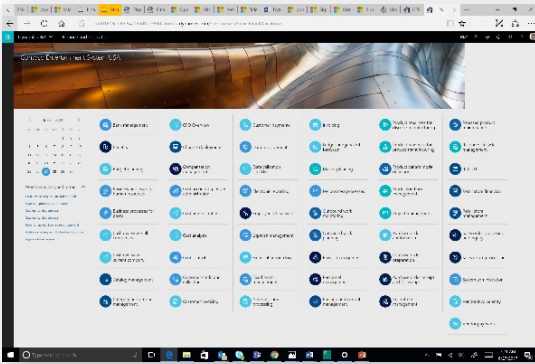

### MANUFACTURING

Minimize lead times, fulfill customer demand, and manage your resources to get greater efficiency from your discrete, process, and lean manufacturing operations. Use real-time data to track production progress, get more accurate delivery dates, and reduce costs. Execute multiple production strategies, including configure-to-order, assemble-to-order, make-to-stock, and make-to-order. Use both push and pull production-control mechanisms.

## SUPPLY CHAIN MANAGEMENT

Improve supply chain velocity, exceed customer expectations, and optimize your profitability. Connect sales and purchasing processes with logistics, production, and warehouse management to provide visibility and management throughout the supply chain. Enable streamlined vendor collaboration and manage distributed organizations with inter-company and multi-site capabilities.

## CLOUD SERVICES

Roll out a powerful ERP application to get real-time information on almost any device, at any time. Leverage the unmatched rapid and scalable deployment options that offer you the best of both world (cloud and on-premises) to meet your global business requirements of today and have the flexibility and ease to change as your business needs evolve over time. Simplify and accelerate business process changes, seamlessly integrate with legacy systems, and scale globally at your own pace.

## Dynamics 365

Transform how you do business. Capture new opportunities across your organization when you bring people, data, and processes together with Microsoft Dynamics 365—intelligent business applications that help you manage and run your entire business while better engaging customers.

“Through Microsoft Dynamics 365 for Operations and its seamless interplay with other office products, BI is not just for experts anymore. We make decisions faster based on data we trust, putting us in the position not only to react just in time, but to be one step ahead.”

Antonio Baldaccini  
CEO, UmbraGroup
