

Vision Officer Early Intervention System

<https://www.quartech.com/usa/justice/#eis>

Our EIS accelerator allows the department the flexibility to implement only the modules needed. Quartech understands that an Early Intervention System (EIS) is not a one size fits all for large departments. Departments need to leverage existing system investments and where possible utilize existing operational processes and data.

This flexibility also allows departments to easily implement reform initiatives such as Quarterly Reviews, Supervisor Notes and Supervisor Dashboards.

Agencies must have the best tools to shape and guide their EIS implementation to gain “buy-in” among command staff and patrol officers.

Quartech EIS (Vision) Fast Start Approach

Our *Fast Start Approach* has three components:

1. EIS Technology Accelerator

2. EIS Tools, Processes and Templates

SQL

ETL

3. EIS Baseline Configuration / Dashboards

Key Features of the Vision EIS

360° View of Officers

The Employee Profile module creates a consolidated view of all available data

Vision enables transparency for officers so they can see their own data

Supervisors can see all information in a single source

Access to EIS Thresholds

Ability to configure and test thresholds using “what if” scenarios

Configurable workflow to streamline processes

Multiple Peer Group assignments for more accurate analysis

Extendable Framework

The modular design of Vision creates a framework for developing additional functionality

Data can be entered directly into a module or interfaced from an existing system.

Typical EIS Data Sources

1. Personnel (HR)
2. Complaints and Use of Force
3. Pursuits
4. Accidents/Collisions
5. Scheduling
6. Civil Liability
7. CAD/RMS
8. Field Based Reporting
9. Secondary Employment
10. Training
11. Work Injury
12. Canine

EIS Baseline (Vision) Data Sources

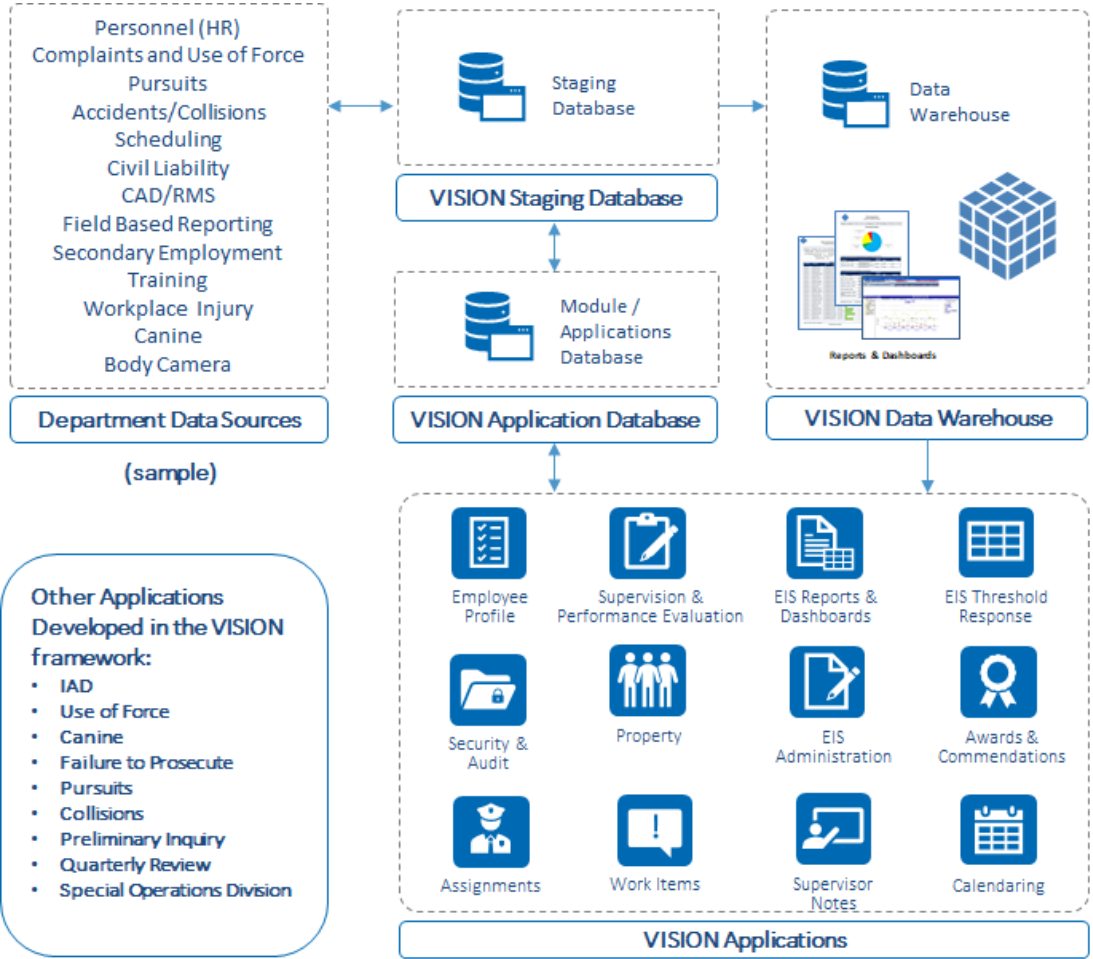

1. Supervisor Notes
2. Awards & Commendations
3. Officer Property
4. Quarterly Reviews
5. Threshold Response

Vision Officer Early Intervention System

The Vision EIS architecture is developed using Microsoft .NET and PowerBI

Vision Implementation can be scaled based the department needs

The application can be deployed on premise or in the cloud

Large Department EIS Implementations

Los Angeles Police Department	New Orleans Police Department	Oakland Police Department
First EIS application with a go-live in 2007.	Added a Quarterly Review module	Go-Live of the Vision EIS Accelerator in late 2019
Long Term Quartech client	Integrated with existing document management system	Complex Workflows to streamline processes
TEAMS II being upgraded to TEAMS III as well as developing mobile and collisions applications	Configurable workflow to streamline processes	Six additional Operational applications
